Symposium

Protect Child Rights from Threat of generative-AI (Artificial Intelligence)
～Free from Online Sexual Exploitation of Children～

9 April（Tue）14:00-17:00（JST）
United Nations University（Reception Hall） and Online ＜Hybrid＞

The threat of CSAM/CSEM by generative-AI is emerging globally. In 2023 ChildFund Japan announced the publication of the results of an awareness survey on child pornography. About 70% of respondents answered "AI-generated content that involves child sexual expressions should be subject to regulation" or "should be subject to regulation somewhat." ChildFund Japan has invited the Internet Watch Foundation to discuss how we can work together to stop child sexual abuse online. ChildFund has organised a symposium for public awareness in Japan.

Keynote Speech

Susie HARGREAVES
Internet Watch Foundation (IWF) CEO OBE

Threat of Generative-AI to Child Rights

Panel Discussion

Toshiaki TATEISHI
Internet Content Safety Association (ICSA)
